

MOLD MAKER AND INJECTION MOLDER

ENVIRONMENTAL QUALITY POLICY

CG5200 – REV. 01 dtd 24/10/2024

BDL S.r.l. pursues the goal of ensuring maximum customer satisfaction through the design and manufacture of innovative products, characterised by criteria of reliability, durability, safety, clarity of installation and cost-effectiveness of maintenance.

BDL also believes that respecting and safeguarding the Environment is fundamental to ensuring the company's continued growth and high levels of performance in terms of service and product quality.

These objectives are pursued through a management policy aimed at building a corporate structure in continuous development and improvement, with the ultimate goal of guaranteeing the utmost attention and professionalism to customer needs, through fulfilment of the applicable requirements of ISO-9001:2015, and to environmental protection, through fulfilment of the applicable environmental requirements of ISO 14001:2015.

In order to make better choices and actions, business planning uses a risk-based approach to circumvent or contingent risks associated with complex business activities, maximise the identification of opportunities and ensure smooth management of internal processes.

BDL S.r.l. has also sought to seize opportunities such as the adoption of remote work, the downsizing of internal spaces, the rationalisation of certain processes, and continues to pursue objectives consistent with the quality, safety and environment policy, aimed at customer satisfaction and meeting applicable requirements.

Specifically, the objectives for the current year are:

1. Maintain our certifications: ISO 9001:2015 and ISO 14001/2015;
2. Eliminate or minimise environmental impacts related to production activities, in particular by eliminating or reducing: waste, scrap, emissions, etc;
3. Ensure that all workers are trained, informed and sensitised to carry out their tasks, including respecting the surrounding environment;
4. Prioritise collaboration with suppliers able to guarantee the compliance of products and services with the main environmental regulations of reference for BDL activities (such as REACH, RoHS, SDS, etc.);
5. Monitor BDL's impact on CLIMATE CHANGE and the effects of climate change on BDL.

ENVIRONMENTAL QUALITY POLICY

CG5200 – REV. 01 dtd 24/10/2024

To enable the achievement of the above objectives, the Management is committed to the following:

- **Carrying out internal audits;**
- **Improving processes;**
- **Monitoring and improving** environmental impacts;
- **Providing the necessary resources** for the correct functioning of the system;
- **Carrying out periodic maintenance** of equipment and facilities;
- **Establishing Training Plans;**
- **Evaluating and selecting Suppliers;**
- **Reviewing the performance of the System through periodic Management Reviews;**
- **Developing and maintaining open and collaborative** relationships with all interested parties.

The objectives are periodically monitored and updated, through specific improvement plans, in order to check their continuous effectiveness and consistency.

The Policy is communicated within the organization through posting on company notice boards and is available to interested parties on request.
